Engineer Your Career

Be a Street CraneXpress Engineer

Give Your Career a Lift

As director of Street CraneXpress, a family-run 100% British-owned business, I'd like to tell you a little more about working for this very special company.

We keep British businesses running, from small workshops to the production lines of the world's industrial giants.

Street CraneXpress engineers combine their knowledge of overhead cranes with mechanical and electrical engineering expertise, to solve our customers' lifting problems.

Be a Street CraneXpress engineer. Read this Prospectus to find out more. And if you have any questions, please feel free to contact us at recruitment@scx.co.uk

Ray Fletcher
Director

Experts in Overhead Cranes

Street CraneXpress engineers specialise in overhead travelling cranes.

Their job is to help keep British production lines rolling. Factories, workshops, garages and warehouses right across the country rely on overhead cranes to take the effort and risk out of lifting and moving heavy objects.

Our engineers keep those cranes moving thanks to decades of experience in mechanical and electrical engineering, a deep knowledge of lifting systems, and by working safely at heights.

Engineer Your Career | Be a Street CraneXpress Engineer

A man in a red shirt is working on a crane in a warehouse. The crane is yellow and has the 'Street' logo on it. The background shows a large industrial space with other cranes and equipment.

Earning Potential

Street CraneXpress has a network of crane engineers right across the UK.

Our customers can call on us at any moment to repair a crane, to install new upgrades, to perform vital safety checks, and to plan crane maintenance around their busy production schedules.

This means we need to be flexible, and there are always opportunities to earn extra money by visiting customers outside of normal working hours.

Many of our engineers take full advantage of these enhanced rates of pay. Through overtime opportunities, a Street CraneXpress service engineer can earn an additional 40% per year on top of their base salary.

Big Company Benefits

Street CraneXpress is an SCX company, part of an internationally respected engineering group.

SCX is famous for its iconic retractable roofs at the All England Lawn Tennis Club, Wimbledon, and the world-first dividing retractable pitch at Tottenham Hotspur's new London stadium.

Being part of a bigger group gives you career progression opportunities, a wide variety of experience, and employee benefits that smaller firms can't compete with.

Health insurance, a fully expensed vehicle, ongoing training, matched pension, life assurance, flexible working hours... All of this contributes to making your working life more enjoyable and productive.

Ongoing Training

Our commitment to health and safety is paramount.

In this industry, it's vital that our engineers, our customers, and the public are all protected.

Street CraneXpress is a full member of LEEA and has invested in technology to deliver multimedia training online, direct to our engineers' tablets. And when practical training is required, we have the SCX Academy, where engineers can get hands-on experience of the latest lifting equipment, tools and techniques.

We believe that training is a lifetime endeavour. Adding new skills throughout your career is what makes a good engineer an excellent one.

Our younger engineers are also supported, by encouraging extra-curricular learning, including HNC & HND qualifications.

The background of the slide is a collage of three images. The top left image shows a close-up of a young child with blonde hair, focused on drawing with a pencil on a piece of paper. The bottom left image shows a man in a dark jacket and blue jeans running on a paved path, holding the hand of a small child in a pink jacket and black hat. The right side of the slide is a solid yellow area with white text.

Flexibility

Flexibility is important.

We all have a life outside work, and this looks different for each of us. Whether you have family commitments, or other personal circumstances arise, we're here to help.

Our staff in head office will work with you to schedule jobs around important life events, giving you a degree of flexibility that other firms fail to deliver.

Street CraneXpress knows that supporting you in your commitments allows you to perform better as an engineer, and to deliver the very best service to our customers.

All Kitted Out

An engineer can only deliver the very best service, in the safest way, with great kit.

All Street CraneXpress engineers are issued with a fully-expensed vehicle, plus a tablet and phone to keep you connected on the road.

And with workwear that's proudly branded in our company colours, every engineer reinforces our values of reliability and expertise to our customers.

Finally, your equipment for working at height helps you to do the very best job you can for our customers. Safely, quickly, expertly.

World Class Engineers, World Class Customers

Our engineers are already working with some of the UK's biggest brands.

JCB, Bombardier, Hitachi, Toyota, Perkins Engines, BAE Systems, Rolls-Royce... These companies and many others trust Street CraneXpress to keep their cranes lifting and production lines rolling.

And we'll grow bigger and better too. We're already talking to dozens of household names about how Street CraneXpress can keep their lifting equipment in tip-top condition.

Street CraneXpress engineers are also called upon by the wider SCX group to work on complex mechanical handling solutions for blue-chip clients in nuclear, defence, energy, stadia, architecture and more.

Focus on Health & Safety

Excellent, class-leading health & safety practices are at the heart of our business.

We have recently received a RoSPA Gold Award for safety, the highest standard we can achieve.

Our regular internal communication – the Engineers' Bulletin – highlights key metrics of incidents, accidents and non-conformance reporting.

We're full members of LEEA, who provide courses and advice on best practice in mechanical handling and lifting environments.

Many training providers are also routinely called upon to keep our engineers and staff up to date on the latest tools, techniques, HSE regulations, and working practices.

Still a Family-Owned UK Business

**Not just Street CraneXpress, but the whole SCX group
is still a family-owned UK business.**

Along with sister company Street Crane (who build many of the cranes and hoists that we install and maintain), both groups are fully-owned by two families in South Yorkshire and Derbyshire.

It's a sociable business too, with charity football matches, golf days, company carnivals, fundraising events and a fantastic Christmas party.

Street CraneXpress recognises that experienced crane service engineers are in short supply.

To help nurture new talent, we created the SCX Academy to grow young apprentices into fully qualified engineers.

Working with capable and eager apprentices adds an extra dimension to an engineer's career. You can guide and teach them as they learn about electrical and mechanical engineering, health & safety, working at height, planning their day, and so much more.

You could make a real difference to a young person's career, and set them on the path to becoming an outstanding engineer.
